Rev. J. A. Aspinwall Severely Walter Hanley Abused Two Nuns Scalded on His Yacht Vanish.

The Preacher-Yachtsman Recovering from His Injuries.

SHELTER ISLAND HEIGHTS, N. Y., Aug. 16.-The Rev. J. A. Aspinwall, who was severely scalded in the accident on board his steam yacht Vanish yesterday, is much improved this mornand he is expected to be out again in a few days. The accident has caused mething of a gloom here, and the indications are that the races, which have been a feature, will be discontinued.

Mr. Aspinwall is well known to New Torkers. Although a clergyman of the ways been an ardent yachtsman, and Until two years ago he lived at Bay Ridge, and then he moved to ington, where his charge is lohere, which he occupies during the Sum-

hera which he occupies during the Summer.

He had his yacht Vanish built by the Herreshoffs, about a year ago, at a cost of \$3,000. It is an open launch, \$6 feet long, with Herreshoff tube boilers and triple expansion engines. It has an average speed of twenty miles an hour.

J. L. Hutchinson, of Barnum, Baitey & Hutchinson's Circus fame, also owns a cottage here, and the yacht Imp. Jarvis B. Edson, of New York, also lives here during the Summer. He owns the yacht Palos, Several other Summer residents own yachts, all of them being about the same size.

While there never has been anything summer residents own yachts, all of them being about the same size.

While there never has been anything like a regular match between the yachts, every day witnesses a number of "brushes." One of these brushes was taking place yesterday when the accident occurred. The yachts engaged in it were Palos, Imp and Vanish.

It was a close race all the way through, when suddenly the tubes in the boiler of Vanish burst. This caused an explosion of water gas, which ignited at oncs, enveloping the whole engine-room in flames. The engineer jumped overboard and was rescued by means of an oar thrown from Palos. Mr. Aspinwall, who remained in the boat, was badly scalded.

Vanish, which was towed into the harbor, was seriously damaged.

Sensitive on That Point.

Joe Sullivan, widely known as the "East Oakland glant," died of congestion of the lungs recently, says the San Francisco Call. Sullivan was twenty-four years old, six feet seven inches in height, and weighed 250 pounds. A native son, he was at an early age deserted by his father, and obliged through childhood to depend upon the charity of friends. He had in his brief lifetime served as fireman, circus freak, laborer and general factotum.

His enormous height was the bugaboo of his life. So extremely sensitive was he to any reference to it that he has often been known to burst into tears when he was looked at over-curiously. He was for some time connected with the Fire Department as driver of the Brooklyn engine. Later he travelled as the giant with Sells's circus at a salary of \$100 a month and board and lodging. His arms were three feet nine inches in length. His foot measure was lifteen inches.

for a Washington newspaper the other day.

"Already it has made obselete between 3,000,000 and 4,000,000 of muskets in Europe that were built to shoot black powder, not to speak of the millions of cartridges, all of which the countries possessing would be willing to sell for a song. Here is a vast sum of wasted capital, but it is the inevitable result of progress. Our army guns in this country will soon be in the obsolete category, for to keep pace with the rest of the world we will have to adopt smokeless powder, too. A gun loaded with it will send a bullet just twice as far as the black powder does Again as far as the black powder does. Again, the new invention changes military tactics entirely, for in the battles of the future troops will never display themselves en masse to the enemy. Open fighting, as has been customary through all the ages, is a thing of the past, for it would mean utter annihilation. If smokeless powder had been in use during the late civil strife the war between the States wouldn't have lasted ninety days."

The idea of protected ships, such as The idea of protected ships, such as the modern men-of-war, is by no means an absolutely new one. This is proved, says the Western Mail, of Cardiff, by the fact that an armored vessel was constructed, though crudely, of course, as for back as ilso by a shipwright of Antwerp during the wars between the Spaniards and the Dutch. The greater part of the Netherlands had come into the possession of the House of Hapsburg in 1477, but in the early part of the sixteenth century it passed to the Spanish Crown.

At this time the principles of the Reformation had spread throughout the lowlands, and when the Spaniards instituted the Inquisition there disturbances broke out. The Spanish soldiery pilaged the towns of the Netherlands in their work of suppressing the rebellion, and Antwerp, being a margraviate, suffered greatly. In the Summer of 1585 it was invaded by the Spaniards, both by fand and water, and the people of Antwerp built the first protected ship on record in an attempt to break through the line of the besiegers on the river. VALE MEN WAVED FLAGS.

The English Court Journal Thinks It Wasn't Dignified.

There is nothing like an international contest for producing bursting enthusiasm, says the English Court Journal, and we have never had a scene upon any English athletic ground to equal that which was witnessed on Monday, the occasion of the Oxford and Yale sports at Queen's Club. The stand where the American visitors the American visitors had chosen to muster had a strange aspect; it was filled with people more or less smart, but all intensely patriotic.

The outward symbols which marked the partisans of Yale were blue slik cloths embroidered with the name of the American university; these the ladies hung over the front of the stands or caught up to wave when occasion required. Cornflowers in huge market bunches were hung about the persons of the "Yaleiles," regardless of effect or expense. The men presented a most undignified appearance, with the "Stars and Stripes" ited to their umbrellas or bundled under their arms, ready to be produced and waved in the faces of the crowd.

barns were struck by lightning and several persons were stunned. No fatalities were reported.

At Boynton Beach, a day Bummer resort near here, the Bunday-School excursionists from this city huddled together in the dancing pavilion during the storm. Eightning struck the wooden building and huge sheets of fame played about the grounds, presenting a terrifying spectacle to the hundreds of children and their parents.

Many ran out of the building into the drenching rain. Once an electric shock seemed to pass through the whole crowd and many screamed in terror.

The railroad tracks on the Long Branch division were washed out of South Amboy, causing a delay to all trains, of two hours.

NEWARK, N. J., Aug. 16.—The centre of last night's storm seemed to break over the little town of Caldwell, and there was considerable damage done by both the wind and the lightning.

About 6 o'clock, when the storm was at its height, lightning struck the large barn of Lemuel Stager on the outskirts of the town. In a moment the structure was in a blaze, and before the neighbors reached the scene the barn and outbuildings, together with the hay barracks, were on fire. The horses and cows were saved, but all of the wagons were burned. The lors as about \$1,000, partily insured. Many trees were struck by lightning. The storm was very severe in this city, many streets being flooded with water. ELIZABETH, N. J., Aug. 16.—During the severe thunder and lightning storm last night an electric bolt struck a house on the Vall estate, in Clark Township, seven miles from here, and knocked out part of the foundation, shattered the side of the building and stunned the inmates.

Mrs. Marshall had her feet baddy burned by the lightning and will be under the side of the blinding and stunned the inmates.

shock.

Another bolt struck a large tree in front of the house, splitting it in two.

The electrical storm was very severe throughout Union County. Many houses were struck in Elizabeth and Rahway.
